Where to Buy S-5!® Products!

Where can you buy S-5!? We sell our metal roof attachment solutions through a trusted network of independent distributors strategically located both domestically and internationally to serve your many project needs. Our dedicated distributors might specialize in one of our solutions or offer a wide assortment of our products. Visit us at www.s-5.com to find your nearest distributor.

Are you interested in becoming a distributor? Learn more by emailing distributorships@s-5.com.

“S-5! is the greatest thing to happen to metal roofing since Galvalume.”
Angelo Borzillo - Co-Inventor of Galvalume® Coating Technology

Version 031820
SOLAR
Attachment Solutions & Products
From Simple Beginnings to Metal Roofs Worldwide...
With more than 50 patents and a nearly 30-year track record as the industry’s leading provider of metal roof attachments, S-5! offers the highest-quality, made in the U.S.A., engineered products at surprisingly low costs. Our clamps and brackets make it easy to attach virtually anything to standing seam, exposed-fastened and corrugated metal roof profiles. Installed on more than 2 million metal roofs and having secured more than 2 GigaWatts of solar worldwide, S-5! is the most trusted name in the metal construction and solar industries.

Like a Saddle on a Horse
In 1992, Rob Haddock, founder and CEO, conceived a simple but powerful attachment solution idea: use a block with a slot that would straddle the seam—like a saddle on a horse. Fast-forward, and his wide array of metal roof attachment inventions continue to revolutionize the industry.

Quality Assurance: Zero Defects
- Proven performance since 1992
- Family-owned
- Certified material and certified manufacturing processes
- 2 GigaWatts track record
- No-cost, 25-year manufacturer’s warranty*
- Load-tested for holding strength on more than 500 different roof profiles, materials and gauges
- 62,000 sq. ft. (5,500m²) state-of-the-art manufacturing facility
- Available at more than 50 locations in the U.S.A. and worldwide

Extensive Quality Control Protocols
- ISO 9001: 2015
- Underwriters Laboratories
- Factory Mutual
- TÜV
- ICC-ES

"The Solar Revolution has been utilizing the S-5! PVKIT solution since it first hit the market. Hands down, it is the best solar mounting solution regardless of roof type. Our projects using the PVKIT yield the fastest installation times, lowest material cost and best aesthetics. We’ve taken a close look at competitor’s knock-offs, and they do not compare. This is because S-5! has been creating innovative solutions for metal roofs longer than anyone else, and their expertise is unmatched."

Doug Claxton - Principal & Founder - The Solar Revolution

Mounting Solar **The Right Way**
You’ll never find broad, speculative advertising claims about our products.
**We can prove everything we say—just ask.**

*Visit our website for warranty details.*
The **PVKIT 2.0** provides a cost-effective *Direct-Attach™* solution. Going rail-less saves time and money, provides better load distribution and is 80% lighter weight than rail mounting at fewer than 3.5 lbs. / kW (1.59 kg).

S-5! direct-attach solutions won’t compromise roof warranties! The **PVKIT 2.0** is the best solution for attaching PV modules directly to any standing seam or exposed-fastener metal roof.

### Product Features & Benefits

| EdgeGrab         | • Pre-assembled components—quick and easy  
                   • Versatile: same kit for 29-42 mm module frames  
                   • Only one tool needed for installation  
                   • 80% less weight  
                   • 25% better load distribution  
                   • Installs with module, reducing lay-out time  
                   • 100% aluminum & stainless components  
                   • Single-piece EdgeGrab installs with ease  
                   • UL-listed ground path; nothing else needed  
                   • Multiple slots for wire ties  
                   • Low profile hardware for flush, clean finish  
                   • Available in black  
                   • Allows load reduction per ASCE-7  
                   • UL 2703 listed  |
| MidGrab          |                                                                                                                                                      | 5.64  |

* MSRP is in USD based on 1 Master Box piece price in U.S./CAN regions. Prices may vary in other regions. Call your local distributor for pricing.
Rail-Mounted Solution:
The SolarFoot is compatible with almost any exposed-fastened roof profile – with the strength, testing, quality and time-proven integrity you come to expect from S-5!

Attach any rail producer’s L-Foot to the roof with ease and dependability. This solution is The Right Way® to secure any rail-mounted solar system to exposed-fastener metal roofs such as AG-Panel or R-Panel.

Product Profile Features & Benefits

<table>
<thead>

</thead>
</table>
| SolarFoot™ | Sits in the valley; attaches to the deck or structure | • 100% aluminum & stainless components  
• Compatible with all L-Foot products  
• Secure rail-mounted systems to trapezoidal roof profiles  
• Water-tight, factory-applied, butyl sealant  
• Integral reservoir prevents over-compressing seal  
• Easy-to-find load test results on website  
• Utilizes either two or four fasteners  
• Integral M8 stud and hex flange nut provided | 3.20 |

* MSRP is in USD based on 1 Master Box piece price in U.S./CAN regions. Prices may vary in other regions. Call your local distributor for pricing.
**VersaGard™**

Attach side-mount rail (no L-Foot required); must attach to deck or structure. (screws sold separately)

**VersaGard™** is compatible with almost any trapezoidal, exposed-fastened profile. No messy sealants to apply! No chance for leaks! VersaGard comes with factory-applied, 40-year, butyl polymer sealant already in the base, and the S-5! reservoir conceals the sealant from UV exposure, preventing drying and cracking.

The circular holes in the vertical part of the bracket support up to 1” (25 mm) conduit. The diagonal slot provides height-adjustable support for PV side-mount rail via the use of 3/8" (9.5 mm), M8 or M10 bolts.

| S-5-V & Mini   | • Fits the same vertically-oriented seams as the S-5-U  
                  • Less versatile but more cost-effective than the S-5-U  
                  • Specifically designed for vertical machine-folded seams | 4.74 Mini 2.96 |
| S-5-Z & Mini   | • Specially designed to fit Zip-Rib®, BEMO, Kalzip® and similar profiles with a round “bulb” seam configuration and seam diameters of ≤ ¾” (19 mm)  
                  • Two-piece clamp design allows for ease of installation anywhere along length of the rib | 6.13 Mini 5.17 |
| S-5-ZF         | • Flange clamp specifically designed to fit bulb-shaped profiles  
                  • Unique flange design increases ease and versatility of attachment to bottom-mount rails and other nut and bolt connections | 4.42 |

* MSRP is in USD based on 1 Master Box piece price in U.S./CAN regions. Prices may vary in other regions. Call your local distributor for pricing.
Installation is Easy

1. **S-5!** clamps attach to metal roof panel seams with round point setscrews that slightly dimple the seam material.
   - This non-penetrating attachment will not void roof warranties.

2. **S-5!** clamps have maximum holding strength, maintain roof weather-tightness and preserve the manufacturer’s warranty.

3. Don’t be misled — one size does not fit all roofs!

   *Each clamp model has been independently, laboratory-tested on a variety of seam types, profiles and materials to determine the ultimate tensile-failure-loads parallel and perpendicular to the panel seam. Test results are available at [www.S-5.com](http://www.S-5.com).*

   “The solar industry needs real solutions, no rhetoric. **S-5!** has visionary solutions.”

   **Jigar Shah - Founder - Sun Edison**

For PV module solutions beyond direct attachment, S-5! standard and mini clamps meet the stringent requirements for solar installations on metal roofs and are still the choice of popular rack and rail solar systems. From tilted to flat roofs or flush mount applications, the companies listed below rely on tested, trusted, engineered and proven S-5! clamps to secure their installations and safeguard their reputations:

- Ecolibrium Solar
- Everest Solar Systems
- IronRidge
- K2 Solar
- KB Racking
- Mounting Systems GmbH
- Opsun Systems
- Polar Racking
- ProSolar
- Roof Tech
- Solar Clam-P
- Solar SpeedRack
- Unirac
- Zilla

“We would never consider any attachment to our roofs other than S-5!’s. “The S-5! brand is iconic in the metal roofing industry. Their commitment to tested, engineered products and a decades-long history of prudent metal roof attachment solutions is unsurpassed. We simply know from experience their products perform for the life of our roof.”

Ken Gieseke - VP of Marketing - McElroy Metal
Attach snow retention and wind-performance systems, satellite dishes, solar arrays, signs/banners, light fixtures, gas piping, stack/flue bracing, walkways, HVAC, lighting protection, equipment screens, conduit, condensate lines and more — all without violating the integrity of the roof or the roof manufacturer's warranty!
